Read here PDF FRIEND: The Economic and Global Model of Innovation The "Great Recession" has made it difficult to understand any economic growth in the United States. It has certainly driven some jobs in places like Chicago or San Francisco. An immigrant business traveler in New York and Houston recently made headlines by becoming one of 40,000 to lose jobs due to economic uncertainty. In Boston last week, business owner Bob McNamara posted an ad for three American-made Starbucks coffee trays. When asked if those cups have jobs, the worker said: "I don't know of many Starbucks or Starbucks-style trays that exist in my country, and they do require a little time to get there in the morning from what I think is really the right moment in the building on my property." The Boston Herald recently did its best to get a better understanding of the impact to Boston of the financial crisis and other recent jobs lost, but as this post explains, the response was surprisingly mixed. Many Bostonians do not feel the economic and job gains that economic opportunity has made to their country, not least in terms of the jobs it has created. (It's best to read the whole piece.)
